

Tips

MORNING MUM!

JUST LIKE a Pokémon game on Nintendo 3DS you start out in your house, only this time you are in Serenity Town, with your mum downstairs making breakfast! You can chat with her, and other characters you meet, to find out more about what's going on in Suiquo region. Keep talking with mum and she will give you a Soda Pop and some dollars to spend. "Thanks mum!"

POKÉMON COBALT & AMETHYST

TIME NEEDED: 60+ HOURS
EXTRA INFO: WORKS IN VANILLA & MINECRAFT! SO NO NEED TO MOD!... BUT MODS

ITEM SEARCHING

EXPLORE AROUND the town to get used to your surroundings. You can find items like Burn Heal and Potions in Poke Balls that are worth picking up and storing for later! You won't be able to leave the town though until you have visited the theatre, found Professor Cedar, chatted with her daughter then found the Prof's lab.

WOW! KAYLENE MEETS POKÉMON! - THE ULTIMATE GAME-UP!

POKÉMON COBALT & AMETHYST

Getting started in the new Pokémon adventure!

YOU WILL never believe it! Some clever game designers calling themselves Phoenix Projects have gone and created a mash-up of Minecraft and Pokémon! While this is not an official Pokémon game, it's very professional, and packed with Pokémon fun to discover! Let's take Pokémon Cobalt & Amethyst for a spin...

MEET THE PROF

PROFESSOR CEDAR and her daughter Kaylene can be found in town. Chat with them before heading to the store for a Rare Candy. After further chats with Kaylene back at her house, you will end up in the lab with the Prof. She will have a package for you to deliver to Timon near the exit to Route 16. He'll be so pleased he will give you a Waiver that will give access to Route 17 and get you out of the town!

A MAP OF THE MAP

TO GET around the various areas of the Suiquo region you're going to need a map! Luckily your mum should have shown you one back at home, so just Right Click to bring it up whenever you need it. The Cobalt & Amethyst creators tell us there are 60-80 hours of gameplay to be enjoyed here, with puzzles for all abilities and of course the all-important Pokémon battling! All the 120 Pokémon are brand new ones, made up for the game.

HOW TO GET IT...

YOU CAN download this Pokémon map by following the link on the YouTube video of the game (just whenever looks after you for generations). Just search "Pokémon Cobalt and Amethyst" to find it. To play the map you will need to get your Minecraft game to work in vanilla. U.S. You do this from the Launch Options menu before you start the game.

TEAM TEMPEST

ENCOUNTER! Follow Professor Cedar down Route 17 and you will meet two Team Tempest grunts called Jason and Melissa who are blocking your way. The Prof will give you your first Pokémon - a Pyraci Fox type Pokémon at Level 10. Little Pyraci will evolve into a new Pokémon when it reaches level 30. Melissa will take you to your first Pokémon battle using her level 5 Jolicho Pokémon.

FIRST BATTLE

THE SCREEN will go all wavy and you will be transported to a Pokémon battle arena with a Poke Ball symbol on the ground. This early in the game you will need to experiment with the moves you have available to see which will work best against the Pokémon you're up against. There's no time to stop to see how cute these Pokémon are! This won't be a very tricky battle, you can use a Potion if you really need to, and your little Pyraci will level up and learn the new move Ember! With Melissa beaten, Jason will take you on.
